VOL. No. 34 No. 1 CAMPBELL, SANTA CLARA COUNTY, CALIFORNIA. FRIDAY, JULY 1, 1927

California Ranch News

Death rate of citricola scale, commonly called gray scale of the orange, will be low this year because of the increased moisture content of the soil, according to Frank R. Brann, Tulare county horticultural commission.

Tulare county has a total acreage of 11,006 freestone peaches and 10,684 acres of clings. Last season the canning peaches brought growers approximately $3,000,000, while dried peaches brought $145,000 and shipping peaches, $66,770.

A large part of the water going down Kings River to the mouth of Tulare Lake bed has been used for the irrigation of 5000 acres of land which have had no irrigation water for many years. Frank Blakeley, pioneer lake land farmer, is irrigating the tract and will plant it to grain this fall. The land is along what is known as the Blakeley levee, fifteen miles south of here.

At a recent meeting of the Chino and Ontario Peach Growers Association, it was decided to form a peach pool including approximately 4000 tons of the fruit. It is expected that the crop will be sold the latter part of June. George P. Weldon, president of the association, says that the rumor of low prices is unfounded as far as he is able to find out. He believes good fruit will bring satisfactory prices this season.

Patches of Russian nap weed, a most obnoxious pest, have been found near Corcoran, close to the line between Kings and Tulare counties. Samples of the weed were sent to the State University for identification. The pest was discovered in but a few places, and they will be treated with spray and also with carbon bisulphide for root eradication. The campaign against puncture vine is general in Kings county now.

The California Bankers Association has announced that it will present a gold pin to every boy and girl member of agricultural clubs in California who finishes the club work started this year. According to B. H. Crocheron, director of Agricultural Extension in the University of California, the pins will be in the shape of four leaf clover, with different colors for each year's work completed.

Strict inspection of cantaloupe and watermelons shipped is being practiced in the Imperial Valley and every effort is being made to prevent unripe shipments.

Profits would increase four times over the cost of feed, for the dairymen of the state, if they could double the production of their cows, says E. G. Gordon, dairy specialist of the Agricultural Extension Service of the University of California. Since 1920, he says, the average yearly production in California has increased 34 pounds of butterfat, which means an added yearly return of more than eleven million dollars.

The Railroad Commission has authorized California rail carriers to establish a temporary charge of $5 per car to cover partly the damage to refrigerator cars, and the cost of transporting top ice on intrastate shipments of vegetables and fruits.

Dr. J. J. Frey, chief of the bureau of dairy control of the California Department of Agriculture, points out that the pre-eminence of California in the field of high quality milk production is again exemplified in the fact that in the national certified milk scoring contest recently held in Washington, D. C., California won first, second and third places.

At a cost of but $5 each, members of the Junior Farm Bureau of Fresno County spent a week in observing and studying agricultural conditions in the northern part of the state. Traveling in automobiles, with their own kitchen on a truck, they visited the University Farm at Davis, went to Clear Lake, thence down the coast to Santa Cruz and then home.

Over $2,000,000 were added to the profits of the Sacramento Valley rice growers in 1926 by shipments to Japan.

Tulare county will have a light apricot crop this season, due to inroads of bird pests and some frost damage, according to Horticultural Commissioner Frank R. Brann. This county has about 5000 acres in apricots, mostly of early varieties. About $85,000 is usually received per year from apricots, both dried and for canning.

Golden State
News of Interest to All

A decrease of 2.2 per cent in factory employment in California during May, as compared with the corresponding month last year, is reported by Walter G. Mathewson, state labor commissioner. However, in the face of that there is also shown an increase of 2.4 per cent in the total volume of weekly payroll, representative of a growing average weekly pay envelope.

State Mineralogist Lloyd L. Root's announcement that he does not expect to be in the state service after the reorganization laws become effective on July 29th, has given rise to the report that Fred G. Stevenot of Carson Hill, Calaveras county, may land an executive job in the newly created state department of natural resources.

Classes started last week with the largest summer session enrollment in the history of Stanford University.

Resumption of the state's new highway construction program is threatened with another delay of eighteen months as a result of the decision of the California Truck Owners' Association to invoke the referendum against the highway fund allocation measure enacted by the last legislature. The referendum will automatically hold up until the November, 1928, election the law increasing the gasoline tax 1 cent per gallon, as the gas act is tied into the allocation measure. It is inoperative so long as the allocation law is ineffective.

Work will begin at Elk Grove, Sacramento county, soon on the rifle range, which is to be built by the state.

Two of the highest peaks in California's magnificent chain, the Sierra, now bear the names of two men who lost their lives a year ago in the most recent attempt to scale Mt. Everest in the Himalayas. Members of the Sierra Club recommended the naming. Mt. Irvine, 13,790 feet, and Mt. Mallory, 13,870 feet, located side by side a part of the highest ridge on the Western divide and a few miles south of Mt. Whitney, are the mountains newly named.

Sacramento has been selected as the 1927 convention city of the National Association of Secretaries of State. Word to this effect was received by Secretary of State Frank C. Jordan from the executive committee of the association. The convention will be held at the State capital next September 6, 7 and 8, which dates fall during the week of the California State Fair. It will be the first time the association has ever met in California.

Lease of the Kern River Country Club by Standard Oil Company, plans for immediate drilling of wildcat wells at Edison, extensive development in the west front area adjoining Kern river oil field, and the leasing of thousands of acres of land surrounding Bakersfield by major and independent companies were made known last week in a survey verified by oil men.

Chester Lamb, assistant curator of mammals in the Museum of Vertebrate Zoology, at the University of California, has just captured the honor of taking the first heavy car over the hundred miles of desert and mountain that lie between San Diego and San Ignacio, Mexico. An average of 12 miles an hour was the best time possible and only 7 miles to the gallon of gasoline, paying 75 cents a gallon at the only two filling stations available south of Tia Juana. He gathered 500 specimens along the way of birds, mammals and snakes. The trip was financed by Griffin Bancroft of San Diego.

Mad Bull, Karook Indian marathon runner, was the winner of the 480-mile run from San Francisco to Grants Pass, Oregon, sponsored by the Redwood Empire Association. His time was seven days, twelve hours, and thirty-four minutes. He was not alone in his glory. Melika, 55-year-old Zuni Indian, veteran and runner of the tribe, pushing his tired body the utmost in one last burst of speed, crossed the finish line to take third place in the gruelling contest, after Flying Cloud, tribesman of Mad Bull, had captured second prize.

A crew of men with tractors and graders are at work leveling the aviation landing field at Alturas, Modoc county, in anticipation of the landing of army planes engaged in aerial forest patrol this season. The work is being done by the United States Forest Service in co-operation with the Alturas Golf Club, Alturas Round-up Association and Modoc county, the field itself being county property.

Thomas Sochran, employe of a transfer company of Lindsay, has announced he will be an entrant in a coast to coast hiking trip. The pedestrians are to end their jaunt in New York city. The rules require that participants make all the journey on foot, either walking or running.

APRICOT CROP EQUALS YIELD OF LAST YEAR

The California Crop Reporting Service states that we will have a slightly larger crop of apricots throughout the State than last year and that the Santa Clara valley crop will be about the same as that of last year. In a report just received from the service the prune and cherry crops are also dealt with. The report reads:

APRICOTS—The condition of the apricot crop was estimated to be 61 per cent of a normal on June 1. This indicates a total production of 181,000 tons, which is only 5000 tons above the crop of 1926. The production of Santa Clara county will approximate that of last year. San Benito county will have somewhat less; Contra Costa probably more; San Joaquin valley a little less, while Ventura county in Southern California, which is the most important area in the south, will have a larger production. Figures indicate a slightly lighter crop in the Hemet section in Riverside county.

PRUNES—The prune outlook for the State as a whole is quite favorable at the present time. Reports indicate the condition to be 74 per cent of a normal compared with 58 per cent last year. Santa Clara valley will probably have a crop equal to that of last year, but in the principal producing areas in the San Joaquin and Sacramento valleys and North Coastal section the crop will be larger should present conditions be maintained.

CHERRIES—The harvest is now well advanced and it has brought out the fact that although a light crop was expected, it was not as heavy as was indicated one month ago. The condition is now only 47 per cent of a normal compared with 70 last year. Inter-state shipments up to and including June 5 totaled 284 cars while last year at that time shipments had reached 731 cars. Part of the difference in shipments is due to the present season being later.

Trapped by the Great Western Power Company's recently heightened dam, run-off waters in the high Sierras of Plumas county are forming the greater Lake Almanor—a body of water that now measures 650,000 acre feet. The raising of the dam has made possible the formation of a mountain lake with an area of forty-five square miles. Previously, when filled to capacity, it measured twenty-five square miles.

California's typhoid fever death rate dropped to 2.86 for every 100,000 residents last year, this being less than one-eleventh of the rate which prevailed twenty years ago, it has been announced by the State Board of Health. The total deaths were given as 118 for 1926. No typhoid deaths whatever were reported in 36 of the State's 58 counties, not considering incorporated territory. The report said 28 cities also had clean records.

The University of California at Los Angeles is running the Berkeley campus of the institution a close second in popularity for summer session work. An average of sixty enquiries a day from other cities and states are received at the office of the dean of summer sessions. Classes opened June 25.

The interstate divorce colony recently opened on the shores of Lake Tahoe, is filled to capacity through advance reservations from persons seeking to take advantage of the lenient Nevada divorce laws while living in California. Most of the guests are women. The place itself is half in Nevada and half in California. An inlaid line through the center of the large dance floor marks the State boundary. Sleeping quarters are in Washoe county, Nevada. This permits divorce seekers to satisfy the residence requirements of Nevada while virtually living on the shore of Lake Tahoe in California. Also, they may receive mail in California when they wish their intentions of speedy divorce kept secret.

California's seven teachers' colleges this month added 576 teachers to the army of 22,203 now employed in the elementary schools. These figures have just been announced following a check by the Credentials Commission. San Jose led the field of elementary teacher training institutions with 203, with Fresno second with 111.

Believing that a fare increase is not justified, the Sacramento City Council has instructed the city attorney to oppose on behalf of the city government the application of local street railways for a raise in fare from 5 to 7 cents.

CONSOLIDATED TO MEET SOON

The next regular meeting of Santa Clara County Consolidated has been postponed until July 12. This meeting, which promises to be one of the most interesting because of the numerous important subjects to be discussed, will be held in the New Women's Clubhouse on Castro street, Mountain View.

Policies concerning November Prune Week, participation in the State Fair, the Pacific Highway Association, Chamber of Commerce Summer School at Stanford, Bodfish Canyon Park, and the future of Junior College education in the county will be discussed by the members.

AFTERNOON BRIDGE

Thursday afternoon of last week Mrs. Hattie Baugh and Mrs. M. J. Hohnett entertained at bridge at the home of Mrs. Bohnett on Winchester Road. Four tables were played after which the hostesses served dainty refreshments. A tally of scores showed Mrs. H. C. Smith as highest, Mrs. E. R. Kennedy second and Mrs. L. R. Lenox third. Miss Helen Baugh and her sister Mrs. H. E. Lillingston, received with their mother and sister.

Grain and barley valued at $20,000 were destroyed by flames which swept over 640 acres on the C. F. Day ranch at Patterson, 26 miles west of Modesto last week.

"Death Crossings" on the State Highway south of Modesto, will be eliminated before the end of this year, according to an announcement from R. E. Pierce, division engineer of the State Highway Commission. The work of eliminating the crossings will involve the construction of a subway to cost $100,000. Bids will be opened the latter part of this month and work will start the early part of August.

Intoxication, speeding, reckless driving and other violations of the State motor vehicle act cost thirty-four California motorists their operators' licenses during May, according to a report issued by Frank G. Snook, chief of the State Division of Motor Vehicles. The May revocations brought the total for the year to 198, one-half of which were charged with driving while intoxicated.

R. R. Veale, 63-year-old Contra Costa county Sheriff, embarked on his third marital venture last week. Veale, who has been Sheriff of Contra Costa country for thirty-two years, was married in his own office to Mrs. Marion Cranston Wright, former El Cerrito postmistress, now prominent in school social work.

Soil from the graves of two World war veterans, Julius Keeley and Arthur O. Sherman, both Lindsay boys who died in action overseas, their bodies being brought to Lindsay for interment in Olive Cemetery, will be carried to France by Ralph W. L. Wright, adjutant of the Lindsay post, who leaves soon for Paris to attend the American Legion reunion. There are a half dozen graves of Lindsay's heroic dead sleeping in France, and under this plan, they will be buried under the soil of the homeland.

The news of the starting of construction by the Southern Pacific on the Modoc Northern from Klamath Falls to Alturas and the activity already evident towards the broad-gauging of the Nevada, California & Oregon Railway, owned for the past year by the Southern Pacific, has caused great enthusiasm and a more generally optimistic outlook on the part of local farmers and lumbermen in that section.

Within a month Shafter, Kern county residents will vote upon a $30,000 bond issue to improve the community domestic water system by drilling two new water wells and installing new mains.

Although the sugar beet acreage this year is not much greater than it was in 1926, the crop itself will surpass that of 1926 by approximately 20,000 tons, according to officials of the Santa Ana Sugar Company. This year's crop it is expected, will bring more than $1,000,000 to the growers.

The beet harvest in the Santa Ana area is estimated at approximately 39,000 tons this year. Last year the yield amounted to only 26,000 tons. An average price of $11 per ton is expected.

The Literary Digest says only 9 per cent of the homes in America have electric fans. Then how in the world are the rest of us going to keep cool with Coolidge?

CAMPBELL WATER CO. LAYS NEW MAINS

Water supply, the most necessary of all utilities, but at one time a luxury to town dwellers, can now be considered a commodity the accessibility of which cause very few of its constant users to realize the amount of forethought capital and labor that is required to make available the necessity. Yet the development of water supply must parallel the growth and development of every community. Although certain quantities of water are required for maintenance of life and health, this requirement has never been the real stimulus to the creation of water companies but rather the use of water by industries has been the inducement for such companies.

Fire protection is, perhaps, the most vital and important function of a water works system. The life of the small town which depends upon the continuance of its industries should give its earnest attention to fire protection by providing an adequate and efficiently operated water supply.

The installation of mains capable of carrying water for fighting fire is much more expensive than the ordinary house supply mains, and, for that reason, it is necessary that large sums be invested innon-revenue producing property.

The Campbell Water Company has but recently completed quite an extensive network of larger water mains. On Rincon avenue four new fire hydrants on 4 and 5 inch mains have been installed. 2300 feet of new mains have been laid in various parts of town and seven double head fire hydrants have been installed on Campbell avenue.

These new lines have been so placed that in several places water can be furnished to hydrants from two ways. Gates have been set that in case of repairs only a small portion of the system will be without water at any time. This work has been done at considerable extra expense to the company and the community is thereby made a much more desirable place in which to live and build homes.

COMMUNITY SHOCKED BY DEATH OF YOUTH

Mr. and Mrs. L. C. Ralston and daughter, Miss Beatrice, are extended every sympathy in the sad tragedy which entered their lives, Tuesday, in the self-inflicted death of their son, Jackson.

The young man, but 20 years of age and with every prospect apparently to make life well worth the living but for some unknown reason, put an end to that promising young life.

An employe on the ranch found his body late Tuesday afternoon in the barn with a bullet from a 22-caliber rifle in his brain. A coroner's inquest was held which pronounced death resulted from a self-inflicted shot.

P O CLOSED MONDAY

The Campbell post office will be closed Monday, July 4, only the first mails being handled. Mail will be sorted to boxes, but the windows will not be opened and there will be no rural delivery on that day.

Mr. D. A. Yeager, rural mail carrier, who is State secretary of the Rural Carriers' Association, will attend the State convention of that organization which will convene July 3-5 at Haywards. Yale Maxon will substitute for him on the route during his absense.

Dr. W. I. Merrill and family returned Tuesday from a two-weeks vacation spent at Twin Lakes and Paso Robles where they visited Mr. and Mrs. Ralph Cookson.

CAMPBELL CLUB PROGRAM AT SAN JOSE

Charlie Crook, president of the San Jose Kiwanis and one of Campbell's adopted sons, gave a very interesting talk on the high lights of the International held at Memphis recently. He told of the enjoyable trip there and home saying that the sociability on train board was a real Kiwanis inspiration in itself. He pictured workings of the convention and told of the place in the sun that the California-Nevada district held because of its remarkable attendance record which won the big banner for all time.

Hal Morton acted as chairman for the hour and thanked Brother Charlie on behalf of the club for his instructive talk.

Ralph Hyde reported for the special relief committee that $50 in choice canned prunes which the Campbell Kiwanis Club had purchased for the flood victims' relief would soon be shipped with about two carloads of canned and packed Santa Clara valley fruits to the stricken zone in Louisiana. The idea of this form of relief for the flood victims was originated by George Burrow of Campbell Club and was at once taken up by other organizations of Santa Clara county.

By a vote of the club it was decided to change the day of the weekly luncheon to Tuesday thereby eliminating a conflict with Mountain View and giving our members an added opportunity to make up attendance.

Ben O. Curry will be chairman next Tuesday noon and Attorney Frank V. Campbell of San Jose Club will speak on "California Motor Vehicle Laws."

On Monday, July 11, Campbell Kiwanians will have the program at the San Jose luncheon and the Rev. James Bennett will give the talk. The program is now being planned by the local "builders."

Guy Farley reported the work of the publicity committee for the past months.

FIRE COMPANY ELECTS OFFICERS

The Campbell Volunteer Fire Department held its regular meeting on Monday, June 27, at which time the fire boys treated themselves to their annual banquet. They had as their honored guests the three fire commissioners, W. H. Stray, E. C. Merrill and Horace Lea, which all enjoyed. The Tuttle Cafeteria served the supper. Election of officers later at the fire house resulted as follows: Fire Chief, Ed Genasci; Asst. Chief, F. W. Coupland; Secretary, Antone Ferro; Treasurer, Horace Lea.

The finance committee choosen were Clarence Silva, Walter Silberbauer and Oluf Strom.

The fire company is holding weekly drills under the direction of Chief Genasci and the boys are getting very efficient in coupling to the new hydrants.

POULTRY CULLING DEMONSTRATION

A poultry culling demonstration will be conducted next Thursday morning July 7, by Mr. Buster, one of the best authorities on poultry in the State. He is working under the direction of the U. of C. Farm School.

The demonstration will be held at the Louis Shelley Deerhorn ranch on the San Jose-Los Gatos highway a mile south of Campbell at 9 o'cock. The plant is at the third house south of the Almaden tracks, near Oakhurst station on the Peninsular line Following this demonstration a short talk will be given on poultry finance by Mr. Buster.

Being patriotic is all right, but a little action with it won't hurt anybody.

Campbell Declaration of Independence

The Fourth of July fires the enthusiasm of every citizen. It marks the celebration of the adoption of a great document in the story of North America. But the needs of the old Declaration have passed into history. No longer do the people of this great country fear or deride a foreign king. Rather do they think of the Mother Country across the sea in a spirit of harmony and close alliance in Anglo-Saxon kinship.

What Campbell needs is a little "Declaration of Independence" of its own against King Apathy and indifference. Paraphrasing the memorial document of 1776, and applying it to our community; we say to such a "King:"

He has refused to assert to our laws, whereby the Public Good has suffered smartly, while others have escaped a well-deserved term in ye bastile.

He has forgotten to paint up and clean up in many and divers manners, even while there was the withal in ye Exchequer.

He has plundered our Streets and highways, and ravaged our Sidewalks, leaving his Spoils of Rubbish in places wont to be clean and free of Tire Punctures.

He is at this time transporting Large Armies of House Flies and perchance Mosquitos to Complete the Works of Death, Desolation and Tyranny!

He has constrained our Fellow Citizens not to meet together and to bear Arms against Co-operative Effort, whereby Small Attendance has resulted at Meetings for the Public Weal.

He has incited Domestic Insurrections Among Us, where several Civic Improvements and Public Works have been delayed because of his renting our Minds of Dissension and Discord.

He has endeavored to suppress support of Local Business, and has permitted the Merciless Savages of Peddler's Competition to ring our Door Bells and turn the pages of Ye Mail-Order Catalogs!

He has critised without Facts, slandered without Proof, and at this time seeks to erect a multitude of new but unfounded reasons why Campbell should not grow and develop and enjoy ye fruits of prosperity.

Therefore, We the People of Campbell assembled, appealing to the civic conscience of our citizens for the rectitude of our Intentions, do in the Name and by the Authority of the good People of this Town, solemnly Publish and declare that Campbell is and ought to be free and independent from Old King Apathy and Indifference, and all connection with this Old Bird from henceforth and forever be totally dissolved; and that we are just as Progressive and Up-To-Date and Ambitious as any other Baliwick in ye Realm; and that Business hereafter will flourish, friendships will be cemented, boosters will organize, schools and churches will advance, homes and buildings will continue to be erected, and all the Community round about will make our Town their Town; and for ourselves as well as for posterity in support of this Declaration, with a firm reliance in All, we mutually pledge to each other our Aspirations, a little of our Fortunes and considerable of our civic Honor!

NATURE AT YOUR DOORS

A millionaire will buy a famous painting at a fabulous price. **Not because the** view is rare, but because the reproduction of the view is rare.

It is a source of satisfaction to some who can have the pride of possession in beautiful things. But to all who use their senses the glories of nature are at their very door.

Great pictures—natural scenery—are before him who looks to landscape or twinkling stars. Wonderful sculpture confronts all of us in the hills and canyons, valleys and plains. Rare perfume is scented from beautiful flowers. Music comes from the swaying of trees and songs of meadowlark and mockingbird.

In places made beautiful by man all handiwork points back to nature, to the rustic and quaint. Imitations rocks, trees, flowers, waves of the sea, golden harvests and moonlight feature the decorative arts and architectural designs.

Possession of the real is ours to enjoy; while imitations of the genuine are ours to fashion.

Dining car menus on Southern Pacific trains are featuring Imperial cantaloupes. These cards show a picture of a valley melon field and give a brief story of the industry here, stating among other things that the Imperial Valley produces two melons a year for every man, woman and child in the United States.

The apricot harvest is on in the San Joaquin Valley with abundance of labor. The crop is not as heavy as last year but the quality is of the best and prices are good.

Special Fire Works Sale at Smith's

The City Planning and Building Company has announced its intention to file application for a permit with the San Francisco Board of Supervisors for a $75,000,000 tube running under San Francisco bay to Sausalito. The company proposes to ask for a fifty-year franchise to conduct a three-tier tube on a toll basis, with all classes of transportation to be handled. Cost of construction of the tube alone would be approximately $18,000,000 per mile, a total of $45,000,000 for the two and one-half miles which the tube is planned to run. Cost of terminals total $75,000,000.

Cong'l Church

You are cordially welcomed to the services on Sunday. The Rev. J. H. Bennett will preach at 11 a. m. Subject: "Living in a New System," also at 7:30 p. m., subject: "Chaos or Comradeship."

During morning service the children will have their part and the choir will render an anthem: "God is a Spirit." Come and hear an Englishman's message to Americans on "Independence Day." Communion service will follow the morning sermon.

CHURCH NOTICE

Odd Fellows Hall, Campbell, California. Full gospel services every Saturday at 8 p. m. Monday at 8 p. m. Bible study Thursday at 3 p. m. Childrens Bible school. A hearty welcome is extended to all. Come.

M. E. CHURCH NOTES
W. C. Robins, Minister

Sunday, July 3rd, at 7:30, there will be a patriotic service, one-half hour of pictures and gospel music. Address "What Is America." Special music. Sermon at 11, by the Pastor. Come and get your soul refreshed.

Young people will observe the morning watch. Meeting at church, 6:30 and going to Albrights Hill and returning home for breakfast.

Young peoples' Bible study at 6 p. m. led by Tom Byrnes. Devotional service at 6:30. All young people are invited.

S. S. at 9:45 a. m. with classes for all grades. Strangers are cordially welcome.

Friday night July 1 the monthly meeting and social hour at Parsonage, time 7:45. Members and friends are cordially invited.

Town Tales Tersely Told

FLAGS AT SMITH'S.

The S. N. Hedegard family will spend the Fourth at their cottage at Capitola.

Mrs. Ellen R. Smith spent the week-end in San Francisco while her house was being papered.

Miss Rebecca Martin of San Gabriel is visiting her grandmother, Mrs. Mary Lanphear.

The A. N. Lantz family went to Capitola the first of the week to spend some time at their cottage.

Mr. and Mrs. Ben Rodeck and little daughter came up from Monterey to spend Sunday at the family home.

Miss Wilma Smith was in San Francisco for several days over the week-end, the guest of Miss Helen Ryan.

Mrs. C. E. De Selle, with her sons, Melvin, Raymond and Paul, is spending the week at their Seabright cottage.

Uncle Joe Bohnett went to Chico Saturday, where he is visiting with his daughter, Mrs. E. A. Powers and family. He expects to remain over the Fourth.

Stephen Merrill is at Camp Roberts, Pescadero with the Co. Y. M. C. A. boys. He writes that he has [illegible] regarded the "rag" a cove[illegible] that busine[illegible]which all are eager to attivities have

We are glad to report the continued improvement of Mrs. J. C. Ainsley and trust that she may be out again ere long.

Mrs. J. D. Blaine and daughter, Mirian, were guests of Mrs. W. H. Stray and Helen last week at their cottage near Boulder Creek.

Ralph Gardner and Burnett Whitford left Monday on a fishing trip into the Feather river country where they hope to haul in some of the "big ones."

Mr. and Mrs. Gilmore Duncan and children are spending the summer at the F. E. Duncan ranch on Johnson avenue which Gilmore is superintending for his father.

Mr. and Mrs. Will Duncan of Lancaster are here to spend part of the summer with relatives, the F. E. Duncan and R. W. Kennedy families. Mr. Duncan is an ardent booster for the "Boulder Dam" and he may give our readers some light on that subject at a later date.

The Congregational Guild wish to extend their thanks to C. B. Fields for the generous donation of sample packages of groceries which he gave them for their recent sale and upon which they realized a generous sum toward the improvements which they had made upon the church.

Irving Townsend and Mrs. A. B. Townsend took Miss Ruth Townsend, Miss Evelyn Voge and Miss Faith Thomas to Camp Minkalo on Silver Lake in the Sierras Wednesday. This is one of the Camp Fire Girls' camps and they are anticipating a very wonderful time.

WHAT IS SUCCESS?

It's doing your work as best you can,
And being just to your fellow man;
It's making money, but holding friends,
And staying true to your aims and ends;
It's figuring how and learning why,
And looking forward and thinking high,
And dreaming a little and doing much,
It's keeping always in closest touch
With what is finest in word and deed;
It's being thorough, yet making speed,
It's daring blithely the field of Chance
While making labor a braver romance;
It's going onward despite defeat,
And fighting staunchley, but keeping sweet;
It's being clean and it's fighting fair
It's laughing lightly at Dame Dispair;
It's looking up at the stars above,
And drinking deeply of life and love;
It's struggling on with the will to win,
But taking loss with a cheerful grin;
It's sharing sorrow, and work and mirth;
And making better this good old earth;
It's serving, striving, through strain and stress,
It's doing your noblest—that's Success.

Miss Edna Burns a bride of yesterday was given a shower last week at the home of Mrs. L. E. Eddlemons by a group of her sister Rebekahs of the Campbell Lodge.

LONE SCOUT NOTES

The Lone Wolf Tribe of the Campbell Lone Scouts recently held its second election. Melville Voge was elected chief, Dick Robinson, Sachem; Reade Hall, Scribe; and Harris Gardner, Wampum Bearer.

The Busy Beaver Tribe is having a paper drive which keeps the members busy on the lookout for paper.

The Lone Beaver Tribe was recently organized by Spencer Holmes. The Tribe is showing action already as it is building a clubhouse which will be finished soon.

There are now nearly thirty Lone Scouts in Campbell and new members are enrolling.

Spencer Holmes

Word has been received that Thomas Mendel is enjoying his vacation sight-seeing in Alaska.

The Campbell Post Office has been doing a rushing business the past week in the sale of Lindbergh Air Mail stamps.

A. D. Rice of Rincon avenue had the misfortune to break his right wrist Saturday while cranking his truck.

Miss Hannah Bannister of Boston, who had been visiting at the home of her brother, J. Bannister and family of Minna street, left Thursday for San Francisco. Mr. John O'Brien who had also been a guest at the Bannister's left the same day on his return.

Wm. Barlett has leased his lunch and confection parlor and filling station to H. and A. De Wit recently of Merced. The lease is effective today, but Mr. Barlett is not just decided as to his own plans for the future. He has also leased his house, the former Stallman property to Miss Steele of the Grammar School faculty.

The community was greatly grieved to hear of the illness of Mrs. Huldah Parker, who suffered a slight stroke of paralysis Friday afternoon. Mrs. Ducan and Mrs. G. R. Newcomb were summoned from Lake Tahoe and returned at once to assist in her care. We are glad to report that she is improving steadily and we hope to see her out again soon.

The U. S. A. is a pretty good country after all. While Cal is resting in South Dakota nobody will attempt to capture Washington or assume the Presidency.

Special Fire Works Sale at Smith's

The Tulare county fire warden reports that the owners of the big combined harvesters in the Tulare Lake bed are co-operating with him to keep fire losses to a minimum and that each machine will be equipped with two chemical outfits, a barrel of water and wet sacks. Kings county keeps a fire fighting apparatus in the grain section from year to year, with organized fire squads of farmers who haul the fire apparatus from established stations to the scene of a conflagration at a speed not surpassed by that of the metropolitan fire departments, though the rurals have nothing but rough ground for trackage. During 1923, when over $4,000,000 worth of grain was harvested in the lake section, there were only a few fires and the losses of a few thousand dollars, due largely to the county's excellent fire fighting provisions.

A further decline in the prospects for a good apple and pear crop in California, together with an additional loss in cherries and an improvement in apricots and prunes, is reported recently by E. E. Kaufman, Federal-State crop statistician, in his monthly crop condition bulletin. The apple crop is expected to total 7,365,000 bushels, much below the prospects of a month ago. The heavy drop of pears in some localities and blight damage in others has cut the pear crop. Bartletts, making up 88 per cent of the acreage, are reported as spotted, while the fall and winter varieties are said to be very light. The crop is expected to reach 193,000 tons, against 207,000 tons in 1926.

Almost a mile above sea level the fertile valleys in the Sierra Mountains are being developed into farms to supply markets of the West with fancy, late-season truck garden products. In Brite Valley, ten miles from the city of Tehachapi, a large acreage is being planted this year to cauliflower and lettuce to supply a demand in Los Angeles markets for products of prize quality that will be ready for shipping in December. Experiments have resulted well and growers are confident that the crops will be large. The truck-garden products will be entered in a giant display that Tehachapi is planning for the 1927 Kern County Fair to be held beginning September 13.

Dairymen of Pomona are interested in the movement recently started among dairymen in the southeastern part of Los Angeles County and in San Bernardino county to secure State indemnity on milk cows branded as tubercular and on those killed after State inspection. The present system of branding and killing cows listed as tubercular, without compensating the owners, is considered by many dairymen as unjust and as too heavy a strain on the dairy industry. Committees have been formed to circulate petitions bearing on the matter in the Chino and other dairy districts of the State, so that these may be presented to the next legislature.

An increase of nearly 3,000,000 bushels in California's wheat crop over last year was forecast by E. F. Kaufman, crop statistician of the federal and state departments of agriculture. The estimate is set at 14,830,000 bushels, which is equivalent to 444,900 tons. Last year the wheat production was 12,015,000 bushels. No production estimates for other grains are made by Kaufman, but he reports the condition of the barley crop to be about 4 per cent under last year and that of the oat crop about 6 per cent less. The season is from two to four weeks later than last year and about ten days behind the normal.

Over 1,000 acres of apricots in Tulare county last year produced $25,000 in export value to growers, and the amount this year will be even less. Birds and frost were contributing causes of the decline. The plum harvest is also running low, birds causing some of the damage, and frost being responsible for a rather spotted condition, which makes a crop estimate difficult. There are 6,217 acres of plum trees in Tulare county.

Farmers of the Redlands section are making a drive on the puncture vine, for now is the time to eradicate it with the least work, the authorities say, for the burrs are just being put out and if the vines are hoed up, piled and burned now there will be little trouble for the rest of the summer. If they are permitted to go to seed, there is trouble all the rest of the year.

Recent estimates of the United States Department of Agriculture say that 1,121,000 more people moved away from farms than moved to them in the United States during 1926.

Grazing Inspector R. R. Hill of Washington, D. C., and Fred P. Cronemiller of the San Francisco federal forestry office are at present engaged in investigation work on the Modoc National Forest in connection with a controversy of many years standing between the sheepmen and cattleman running stock on adjoining ranges.

A tiny piece of land held by a homesteader, D. M. Halbert, near Bakersfield, is a bloodless battle ground in an attempt of oil interests to build a tortuous road over the rolling hills into the new oil area three miles northwest of Round Mountain Oil Field. Only this key piece of homestead property, protected by fences and heavy padlocked gates, is in the path of the road over which heavy derrick equipment will be hauled and the owner will not give a right of way, it is said. To build around the homestead will cost the oil developers a large sum.

A nation-wide appeal urging all America to support the San Francisco Bay bridge program was broadcast by members of the official bridge commission enroute to Washington. The commission has based its plea on the belief that the bay bridge project has assumed the proportions of a national issue.

A marine department for the Stockton Chamber of Commerce was authorized by the board of directors at a recent meeting. George Ditz, prominent attorney, was appointed to serve as chairman of the marine department committee.

Hermetically Sealed Pennsylvania Tennis Balls cost no more at Smith's.

FOR SALE—Household Furniture at house in rear, 39 N. 1st Campbell, Calif., J. A. Moore.

FOR SALE—3-burner Perfection oil stove, with oven. F. W. Coupland S. 3rd st. Campbell

CAUSES OF BOILING ON HARD PULL

If your car boils on hard pulls, the free emergency road service of the California Automobile Association suggests three possible remedical measures: cleaning of the radiator, replacement of the water hose in the event that it is old and the lining curled up, and tightening of the fan belt.

45 MILE TRIP TO BIG BASIN

A forty-five mile automobile tour through the Santa Cruz Moutains began at the farm advisor's office at 120 Front Street, Santa Cruz, Tuesday, June 28 at 8:30 a. m. reaching Mt. Bielwarki at 3:30 p. m. via the State Redwood Park.

This tour was designed to show what proper forest conservation methods can do for the welfare of the Santa Cruz Mountain region.

One interesting feature of the trip, according to the Santa Cruz Sentinel, was the inspection of a typical Santa Cruz county district fire fighting unit. "Minute Men" such as these are organized in each district in the county and each district has a complete set of equipment in charge of the local warden. The whole county system is in charge of State and County Ranger George Gillette.

Much of the forest area of Santa Cruz county has been cut over and later burned over by successive fires. These fires have not only killed fine stands of second growth timber and reduced large acreages to worthless brush fields, but have caused great damage to buildings, fences, and other farm improvements. There are probably 100,000 acres in the county which will produce timber at the rate of 1000 board feet per acre per year when reforested with redwood and associated species and given adequate protection from fires. This growth will mean the cutting and local manufacture of 100 million board feet of lumber a year, which will be a substantial addition to payrolls and created wealth of the county. Much of this timber can be grown on the 62 per cent of farm acreage which is unsuited to crop production. None of these lands can be made permanently productive without the fullest co-operation of every one in the county in the prevention and suppression of fires.

Santa Cruz county has a total area of 278,400 acres of which a very large proportion is mountainous in echaracter and if properly handled will be permanently most useful for timber production, watershed protection and recreation. A little over 57 per cent of the county is included in the 2232 farms but only 62,-233 acres, or 25 per cent of the total area is crop land or plowable pasture. This leaves about 70 per cent of the county in forest and brush land. What happens to this great area is of very vital concern to all people in the county and perhaps most of all to the farmers who use large amounts of timber, whose water supply comes from these mountain areas and whose property is subject to trespass by poorly controled traffic.

In December 1926 a farm bureau committee on conservation was appointed to undertake the developement of a forestry policy for the county. This committee met with the farm adviser and extension forester on February 1st, 1927, discussed the matter and directed the extension forester to draw up a plan and project.

The tour traversed through Felton, Ben Lomond, Brookdale, Boulder Creek, Big Basin, and the Summit to Mt. Bielwaski, where the party inspected the new lookout tower constructed by Santa Cruz, Santa Clara and San Benito counties. Here was given a discussion of the advantages of the new lookout station being constructed on Mt. Loma Prieta and signalling was exchanged between the two lookouts.

TRIALS

...ased, to the creditors of the all persons having claims against the said decedent, to file them, with the necessary vouchers, in the office of the Clerk of the Superior Court in and for Santa Clara County, California within four (4) months after the first publication of this Notice, or within said period to exhibit the same, with the necessary vouchers, to the said Executrix at the office of Bohnett, Hill & Campbell, Rooms 311 - 314 Bank of San Jose Building, in the City of San Jose County of Santa Clara, State of California, where all business connected with said estate will be transacted.

San Jose, California, this 4th day of June, A. D. 1927.

Elizabeth A. DUNCAN

Executrix of the last will and Testament of JOHN F. DUNCAN, Deceased.
BOHNETT, HILL & CAMPBELL,
Attorneys for Executrix.

NOTICE TO CREDITORS

Estate of A. R. MILLER, also known as ALBERT ROY MILLER, Deceased.

Notice is hereby given by the undersigned Administratrix of the estate of A. R. Miller, also known as Albert Roy Miller, deceased, to the creditors of and all persons having claims against the said decedent, to file them, with the necessary vouchers, in the office of the Clerk of the Superior Court in and for Santa Clara County, California, within four (4) months after the first publication of this Notice, or within said period to exhibit the same, with the necessary vouchers, to the said Administratrix at the office of Bohnett, Hill and Campbell, Rooms 311-314 Bank of San Jose Building, in the City of San Jose, County of Santa Clara, State of California, where all business connected with said estate will be transacted.

San Jose, Cal., this 18th day of June, A. D. 1927.

RUTH MILLER EDDLEMON
Administratrix of the Estate of A. R. MILLER, also known as ALBERT ROY MILLER, deceased.
BOHNETT, HILL & CAMPBELL,
Attorneys for Administratrix.

GET THE SAFETY HABIT

Safety in motoring is a habit which should be developed, according to the public safety department of the California State Automobile Association. All drivers should practice safety until the fundemental acts of good driving become automatic.

Yes, Mussolini is a great man and has done a lot for his people. He's got 'em so they won't shoot at anybody but himself.

When your careful bakings are disheartening—

The Oven Heat Control will help you

There's many a good recipe which has been carefully followed and only turns out fairly well.

And there's many a young wife and some older ones too, whose bakings are disheartening. The reason you probably know—the oven wasn't right.

Those years of experience in estimating the oven's temperature are no longer necessary. For the Oven Heat Control on the *new Gas Range* measures the oven's temperature just as accurately as you measure and mix your costly ingredients. In measuring and mixing you eliminate guesswork. With the Oven Heat Control you eliminate it from baking, too.

Let us or one of the local range dealers explain more fully how to bake your cakes and other foods perfectly by means of the Oven Heat Control on the *new Gas Range.*

California Ranch News

Continuing their fight to keep California's orchards and vineyards free of the Mediterranean fruit fly and its closely related insect, the Mexican fruit of citrus fly, several leading agriculturalists of this state conferred with officials of the United States Department of Agriculture and representatives from other states in Washington, D. C., last week.

Last year a crop of fresh Mission figs shipped from Tulare county sold to the New York trade for more than $5,500. The grower got but $300 for the car, and such prices kill the consumer and directly or indirectly injure the grower. It is evident that if the fig industry is to be put on a safe basis, it will be that of the canning cariety.

Enlarging of the state's grain inspection service this year is announced by L. M. Jeffers, chief of the bureau of field crops of the state department of agriculture. While grain inspection is nothing new with the state, it will be conducted this year on a more extensive scale than ever before, necessitating the employment of additional inspectors during the height of the season. Inspection offices are maintained in Sacramento, Vallejo, Stockton, and San Francisco. A certificate is issued showing the grade and analysis of the materials.

Amazing variation in growers' costs in production of Thompson Seedless raisins is being recorded in the farm efficiency study being undertaken by the farm bureau and extension service in Tulare county. Detail study of methods and costs of such operations as pruning and brush disposal are indicative of the wide variations in total costs which may be expected from the completed summaries this fall.

Dr. J. J. Frey of the state agricultural department has been in Siskiyou for a number of days looking after the dairying interests of the county. He stated that this is to be the chief industry of Siskiyou county, and that within two years the output in this county will be doubled. The figures regarding the product in Siskiyou show that in 1925 there was produced 1,298,459 pounds of butter fat, and in 1926 it was 1,748,197 pounds, showing an increase in production of 449,739 pounds.

The California Pear [illegible]s' Association, in their annual session in San Francisco last week fixed the prices for this year's pear crop at $44 a ton for grade No. 1 pears, and $28.50 a ton for grade No. 2. The price for this year's pears is 10 per cent higher than that last year, showing increased soundness in the market.

The board of directors of the Los Molinos Fruit Festival Association, at a meeting last week decided to hold the festival this year on the 12th and 13th of August.

E. L. Adams, president of the Rice Growers' Association of California, has announced that practically all of the 1926 crop of California rice has been disposed of at prices satisfactory to the growers. The 1925 crop was the largest ever produced in California. Adams said the 1927 acreage will be greater than last year's. Japan became a large consumer of California rice last year, the exports to that country eating up the surplus crop of $1,000,000 bags. Adams said the exporting program carried on by the association was a protection to the California growers and to the entire domestic industry.

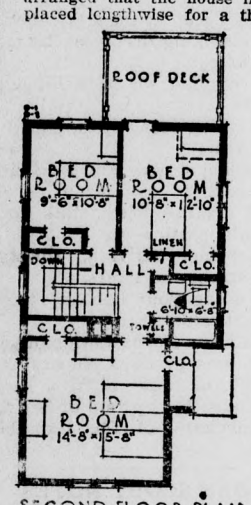
A careful study of the citrus industry in Tulare county is under way at the present time by H. L. Rees of Australia, representing his country in solving a trouble which has arisen in the citrus industry in that country. According to Rees, orange trees are drying up and dying in Australia in certain sections. There is no apparent pest or other cause. Tulare county growers have found that when too much water is applied, their trees are stunted and killed. Rees will make a study of the irrigation practices of this section of the country, as well as other forms of citrus cultivation, to take back with him to Australia.

The Gravenstein Growers' Asso- tion fixed minimum prices on its crop at a meeting held at Napa last week. The prices were adopted unanimously by the directors and may be increased as the season advances if the market justifies such action. The prices, f. o.b. follow: Fancy grade, 150-size or larger, $2.25 per box; 163s or smaller, $2; C grade: 150s and larger, $2; 163s and smaller, $1.75. Unclassified or orchard run with all culls out, $8 per ton, or about $1.80 per box. The Gravenstein crop in Napa and Sonoma counties is estimated to be around 900 carloads.

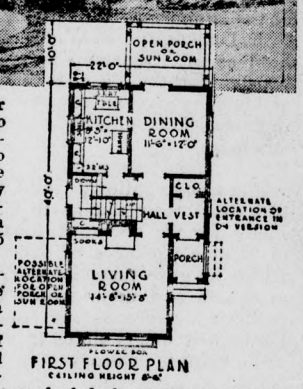
Sales of beef cattle through the California Cattlemen's Association during the second week in June exceeded sales for the corresponding week a year ago by approximately 50 per cent, according to a report just issued.

Old World Charm Meets New World Conveniences

PLACING your house according to your lot is the privilege of the person who builds this practical dwelling of the English farm house type. The entrance is so arranged that the house may either be placed lengthwise for a thirty-foot city lot or crosswise for a 60 or 75 foot lot.



SECOND FLOOR PLAN
CEILING HEIGHT 8'-0"



FIRST FLOOR PLAN
CEILING HEIGHT 8'-0"

The design here calls for a combination of stucco and stained siding with the roof of dark weathered shingles.

The pleasing features of the living room include its windows on three sides, open fireplace and built-in book shelves. The open porch or sunroom may open off from either the living or dining room. The kitchen has all the details that delight the housewife—cupboards, broom closet, breakfast nook and double windows over the sink.

The three bedrooms all have double exposures and are well provided with clothes and linen closets. The bathroom is so placed as to be equally accessible from each bedroom. The attic is ventilated and makes a serviceable storage or playroom by sheathing the rafters and sides with celotex, which serves both as a wall-board and insulating material.

This small home so light and spacious, yet compact and adapted to doing without a servant, is a typical 1926 product. The poky, dark houses of fifteen or even ten years ago with their fussy little hallways and poor planning would be scorned by the modern housewife who has learned to expect comfort built right into her home and to have everything planned for her convenience in working. Cold, draughty houses are also out of date. All well built houses, are insulated as this one is, with celotex sheathing on the exterior walls under the stucco. This effects a great saving in fuel in the winter and resists the intense heat of the sun in summer.

©, Celotechnic Institute, Chicago, 1926.

With three generations of melons grown in a year by the division of truck crops, College of Agriculture, the advantages of the California climate for plant breeding work are strikingly shown by the results obtained in the division of truck crops' cantaloupe experiments. In an effort to find a mildew resistant cantaloupe, 159 varieties were planted in the Imperial valley in December, 1925. In May, 1926, selections were made of ripe fruit from the most resistant vines, and the seed planted at once at the University farm at Davis. Here crosses were made between the resistant selections and varieties of good market type. Ripe fruit from this planting were obtained in August, and the seeds were planted at once at Davis in hotbeds. Seeds obtained from this planting were planted again in the Imperial valley in December, 1926. Thus three full generations will be carried through in one year. If this pace can be kept up for a year or two, some positive results should be obtained.

The Napa County grape crop will be light this season, and in some varieties of juice grapes the yield will not exceed 50 per cent, and in others it will barely reach 75 per cent. This announcement was made at a meeting of the Napa County section of the California Grape Growers' Exchange. While the yield per vineyard is small it is thought that the crop of the entire state will be as large as it was a few years ago on account of the vast acreage of new vines that has come into bearing.

Saratoga Lodge Burns On Sunday Afternoon

The Saratoga Lodge, fashionable resort and former millionaire lumber man's home, went up in flames Sunday afternoon, the loss being about $25,000. The origin of the fire is undetermined.

Two girl horseback riders, discovering the fire, raced into Saratoga, spreading the alarm. Scores of volunteer fire fighters drove to the Lodge by automobile and succeeded in preventing the flames from spreading to the swimming pool building and all of the cottages but one. They were, however, unable to save the main structure and one cottage, which were totally destroyed.

While the origin of the fire has not been officially determined, it is believed possible that it started from a gasoline stove, left unattended by a caretaker, the only person at the Lodge ago, John A. Evans of Los Angeles which had been vacated several months planning to make it into a summer home. The place was originally built in 1910 as a summer home for J. A. Tyson, millionaire lumber man.

AVOID EXCESS OIL IN DIFFERENTIAL

Oil in the differential of your car should not be above the hole in the cover plate during hot weather, according to the free emergency road service of the California State Automobile Association. Excess oil will work out the shaft and through the wheel bearings to the brakes, tires and wheels.
